Incidents may be typed in order to make decisions about resource requirements. Incident types are based on the following five levels of complexity. (Source: U.S. Fire Administration)

Type 5	-	The incident can be handled with one or two single resources with up to six personnel.
512 2	-	Command and General Staff positions (other than the Incident Commander) are not
		activated.
	-	No written Incident Action Plan (IAP) is required.
	-	The incident is contained within the first operational period and often within an hour to
		a few hours after resources arrive on scene.
	-	Examples include a vehicle fire, an injured person, or a police traffic stop.
Type 4		Command staff and general staff functions are activated only if needed.
iype 4	-	Several resources are required to mitigate the incident.
	-	The incident is usually limited to one operational period in the control phase.
	-	The agency administrator may have briefings, and ensure the complexity analysis and
		delegation of authority are updated.
	-	No written Incident Action Plan (IAP) is required but a documented operational
		briefing will be completed for all incoming resources.
		The role of the agency administrator includes operational plans including objectives
		and priorities.
Tune 2		When capabilities exceed initial attack, the appropriate ICS positions should be added
Туре 3		to match the complexity of the incident.
		Some or all of the Command and General Staff positions may be activated, as well as
		Division/Group Supervisor and/or Unit Leader level positions.
		A Type 3 Incident Management Team (IMT) or incident command organization
		manages initial action incidents with a significant number of resources, an extended
		attack incident until containment/control is achieved, or an expanding incident until
		transition to a Type 1 or 2 team.
		The incident may extend into multiple operational periods.
		A written IAP may be required for each operational periods.
T		This type of incident extends beyond the capabilities for local control and is expected
Type 2		to go into multiple operational periods. A Type 2 incident may require the response of
		resources out of area, including regional and/or national resources, to effectively
		manage the operations, command, and general staffing.
	-	Most or all of the Command and General Staff positions are filled.
		A written IAP is required for each operational period.
		Many of the functional units are needed and staffed.
	-	Operations personnel normally do not exceed 200 per operational period and total
		incident personnel do not exceed 500 (guidelines only).
		The agency administrator is responsible for the incident complexity analysis, agency
	1	administrator briefings, and the written delegation of authority.
Ture 4		This type of incident is the most complex, requiring national resources to safely and
Type 1		effectively manage and operate.
		All Command and General Staff positions are activated.
		Operations personnel often exceed 500 per operational period and total personnel will
	1	usually exceed 1,000.
		Branches need to be established.
		The agency administrator will have briefings, and ensure that the complexity analysis
	-	and delegation of authority are updated.
		Use of resource advisors at the incident base is recommended.
		There is a high impact on the local jurisdiction, requiring additional staff for office
	l -	administrative and support functions.
